QUICK TIPS, HELP & SUPPORT

Introducing...

**THE AWARD WINNING**  
CLASSROOM TABLET SOLUTION

We've created this short guide to introduce you to the functions of your LearnPad, the great free tools we've pre-loaded onto it, and eight resource collections we've created especially for you.

LearnPad supports a wide range of curriculum resources including apps, websites and Flash based eLearning material, as well as videos, music, documents and other digital curriculum content.

It also supports access to your existing network resources so you can use much of the content and files you are already using in class.

# About your LearnPad

On the page opposite is a sample picture of the LearnPad student interface. What you can see is a **Lesson Profile** – these are collections of content created to address a particular curriculum need. This is a Primary Starter Lesson Profile and it has six **Categories**. Each **Category** contains a selection of **Resources** which are the actual activities your students will use. These could be apps, website links, documents, eBooks, presentations, videos or music

## CURRENT SCREEN NAME

In the top left hand corner, you will see the name of the Lesson or Category that you are currently in. When you navigate into a Category, tapping on this will take you back to the main Lesson home page.

### PADLOCK

LearnPad can be used in locked (Student) and unlocked (Teacher) mode. When you see the closed padlock, LearnPad is locked. Access to Teacher Tools and System Settings is restricted. Ensure LearnPad is locked before it is used by students. If you want to unlock LearnPad, tap the padlock and enter the password. The default password is 101Teacher.

## TOOLBOX

The toolbox gives students access to common and cross curricular tools, such as an office app, calculator, camera, eBook reader etc. The toolbox is always available, no matter what Lesson Profile you are using. You can also add your own specific resources to the toolbox.

## QRKEY SCANNER

QrKeys are similar to barcodes. They store information that can be read by scanning them with a compatible scanner. LearnPad comes with a built in QrKey scanner, which you can activate by tapping this icon. Once activated, simply aim the red line on the screen at the QrKey until green dots appear on the screen and the LearnPad beeps.

## EXTENDED MENU :

Some menu items don't appear on the top toolbar, you can tap this icon to display the extended menu which contains the following:

**PLACES:** Places help you to manage locations for LearnPads within your school. A Place can be a classroom, an area, or even a building. Learn more about Places in the online support guide.

**TEACHER:** The Teacher menu is a Category where you can put Resources that can only be accessed when the LearnPad is unlocked.

**INFORMATION:** This page shows you the name of the LearnPad that you are using and is also an easy way to check if it is connected to your network (you'll see ticks or crosses under the network information section).

**CHECK FOR UPDATES:** When you check for updates, LearnPad will check if you are using the most recent version of the Lesson Profile currently loaded to the LearnPad. If you're not, LearnPad will update to the latest version.

**SEND LOGS:** We might ask you to tap this if something has gone wrong. It sends useful information to our support team to help us fix issues.

**HELP:** This shows the step-by-step setup instructions to get online and start using LearnPad - this should have already been completed by your network administrator.

## NAVIGATION BAR

At the bottom of the screen you will see the navigation icons:

## BACK

Tap to go back to the previous screen.

## HOME

Tap to return to the LearnPad home screen for the Lesson Profile currently loaded.

## RECENT APPS

If you have used the Back or Home button to exit an app, the app will carry on running. Tap to view a list of running apps. From the list tap an app to open it back up, or swipe an app to close it.

## SCREENSHOT

Tap to capture an image of the display on the LearnPad screen – Please note, this does not start the camera, the camera can be found in the Student Tools menu.

## VOLUME

On some devices you'll see these two icons which control the volume of the speakers or headphones if they're being used. Useful to know in a quiet library or a noisy classroom...

## Sharing and saving work in the classroom

LearnPad's 'InClass' feature allows your students to login on any LearnPad and access their own network files and folders. You may need your network administrator to get this setup for you, but once it is configured your students can use the login button by tapping the icon and simply entering their existing user name and password.

## Once a student has logged in:

- Teachers can see which student is using which device from the online Dashboard
- Students can access their own documents from the school network
- Work that the student hands in to ClassCloud will be tagged with their name

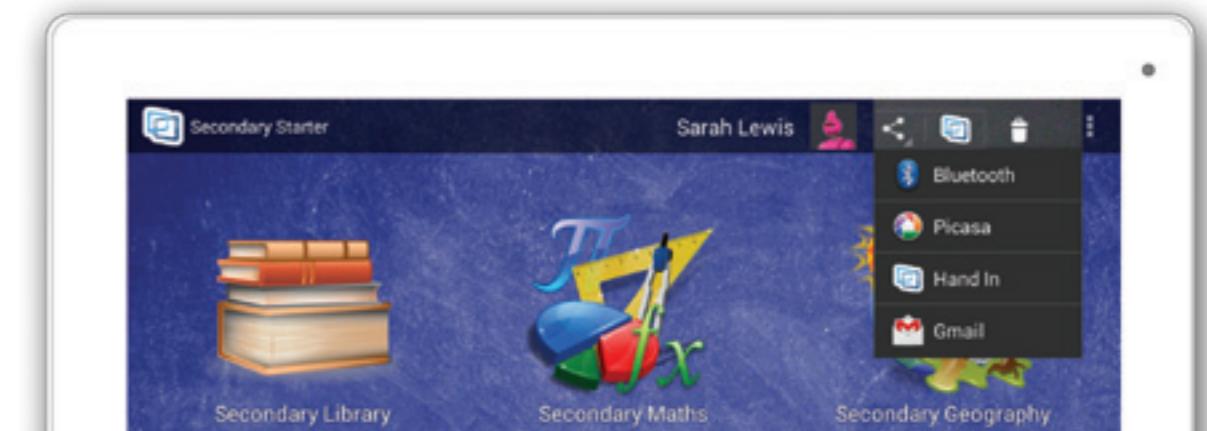

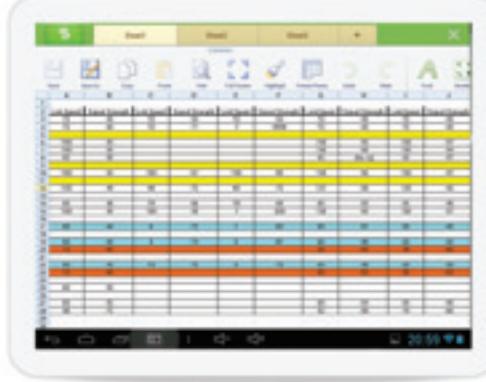

'ClassCloud' is free, secure online storage within the ClassConnect portal. It's really easy to use and requires no setup. With ClassCloud:

- Teachers can upload, store and distribute documents and files to any LearnPad
- Students can easily 'Hand In' classwork, including documents, photos and videos

You can view these files in the ClassConnect portal by clicking on the 'ClassCloud' link or from the 'See Today Files' link on the Dashboard.

Handing out files is just as easy. From the Dashboard, select the LearnPads you want to send handouts to, then click the 'Select a File to Send' link and upload your file. When it has uploaded, it will automatically be sent to the selected LearnPads!

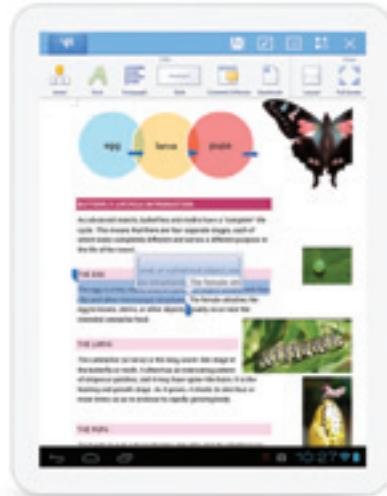

STUDENT TOOLS

## Office Package

With Kingsoft Office students can edit documents created in compatible programmes such as Microsoft Office, and they can create their own documents from scratch. Kingsoft Office is suitable for anyone, from beginners to advanced users.

### Did you know?

It is possible to network your LearnPad devices so that students can modify files that have been previously saved on the network or save new files to the network.

To learn more about this visit [www.learnpad.com/support](http://www.learnpad.com/support)

Doing a lot of word processing? Instead of the on-screen keyboard you could use an external one.

Visit [www.learnpad.co/products/](http://www.learnpad.co/products/) to look at our available products

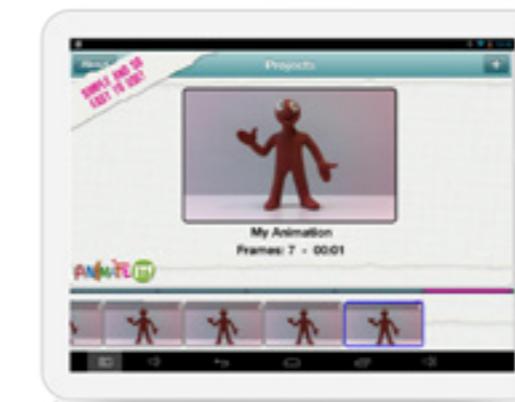

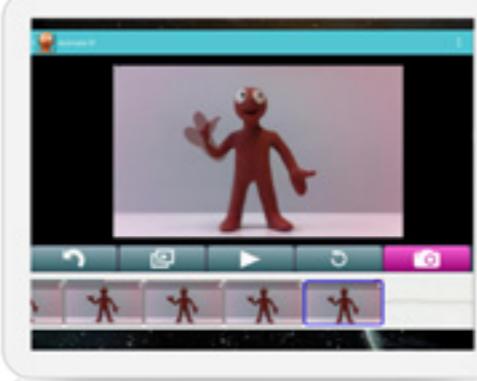

For a full list of the features available and support using this tool, visit [www.ksosoft.com/product/android-office-free.html](http://www.ksosoft.com/product/android-office-free.html)

STUDENT TOOLS

## Animation

Make your own animations with the help of world famous Aardman Animations Studios, creators of Wallace & Gromit!

### Did you know?

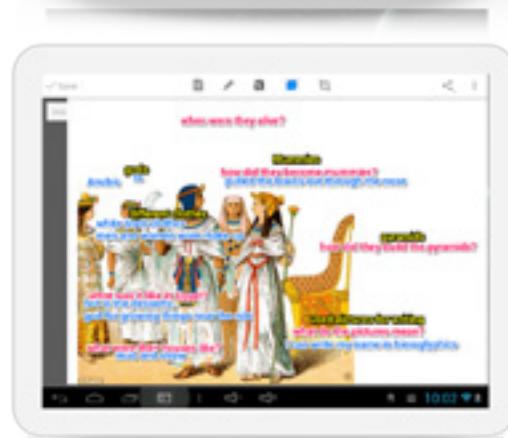

You can use your LearnPad case as a stand to keep the camera in the same place while creating your animation.

Take a look at the Animate It! Website for some tips and tricks [www.animate-it.com/category/get-animating/](http://www.animate-it.com/category/get-animating/)

EXCLUSIVE  
TO LEARNPAD!

Scan me to launch this tool

### Did you know?

Want to organise your annotations as well as notes and photos? This app is compatible with Evernote (available in the LearnPad Store)

### STUDENT TOOLS

# Image Annotation

Skitch enables you to annotate over the top of a photo taken using the device, an image saved in the gallery or one sourced from the Internet. It's a really useful tool for presentation, recording and display work

### WHAT YOU CAN DO:

#### • MANIPULATE

Get your image to the appropriate size and position and then annotate over the top of your image in free-hand using your finger or stylus.

#### • ANNOTATE

Use a keyboard to insert text in the colour of your choice, and add arrows, shapes and lines.

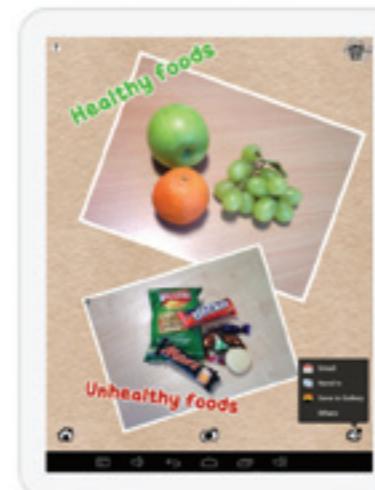

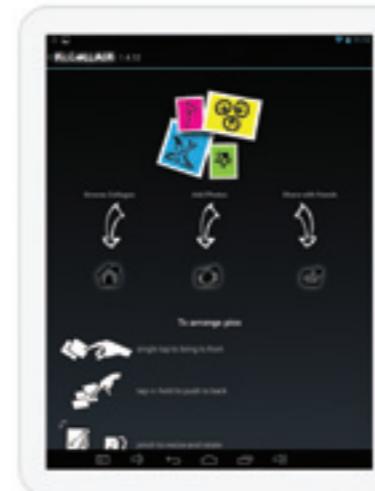

#### • EXPORT

Once completed, annotated images can be exported to the ClassCloud using LearnPad's Hand In feature.

## Lesson Ideas

To help get you started, here are some possible activities that this tool could support:

- Assessment – students annotate an image showing what they know about a topic, what they would like to learn and what they have learned at the end of the unit
- English – annotated freeze frames of the main events of a story
- Geography – annotate maps and photos of the local environment
- Science – take a photo of the setup of an experiment and add labels to explain what you did
- D & T – take a photo of a finished piece of work and evaluate

### STUDENT TOOLS

# Collage Creation

Pic Collage allows you to create collages using images taken with the device, an image saved in the gallery or one sourced from the Internet. It's a wonderfully useful tool for project work.

### WHAT YOU CAN DO:

#### • MANIPULATE

Get the images to your desired size and position by placing your fingers at the edge of the images and dragging them in and out, or rotating them.

#### • BE CREATIVE

Make your collages lively and engaging by adding text, stickers and borders. There are in-built background templates too, so you can quickly and easily add a theme to your collage.

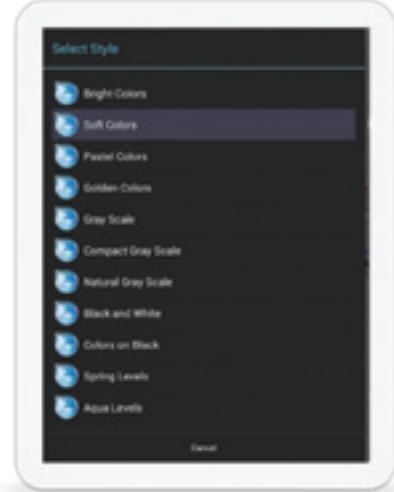

#### • EXPORT

Students can export their finished work to the ClassCloud using LearnPad's Hand In feature.

## Lesson Ideas

To help get you started, here are possible activities that this tool could support:

- Science – sorting items e.g. living and non-living
- Maths – sorting shapes according to their properties
- Geography – positioning map symbols to create a map
- English – sequence a story
- English – sequence a set of instructions
- English – create a setting and characters for a story
- Assessment – collating photographic evidence

STUDENT TOOLS

# Mind Mapping

This pre-installed tool helps students to organise their ideas. Mind Maps are really useful for problem-solving or showing understanding of a concept or idea.

## WHAT YOU CAN DO:

### • ANALYSE

Create a central theme and then create sub-topics which can be dragged, re-positioned and edited. Identify connections by creating a link between them.

### • MANIPULATE

If you're not sure about a change you have made, it's not a problem, just use the undo and redo buttons.

### • PRESENT

Make your Mind Map more visually appealing by adding an in-built style to it.

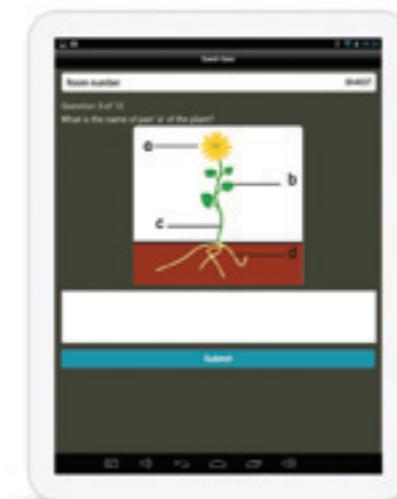

### Did you know?

You can use the screenshot button to keep a record of the mind map you have created.

## Lesson Ideas

To help get you started, here are some possible activities that this tool could support:

- Assessment – share understanding of a topic
- Planning – record and organise ideas for example:
  - ~ English – generate vocabulary to describe characters or settings
  - ~ English – plan the sections of a non-chronological report
  - ~ Computing – create a flow diagram of a set of instructions

STUDENT TOOLS

# Assessment

Assess your students using custom made quizzes. Go to [www.socrative.com](http://www.socrative.com) to set up a teacher account for free and start creating your first assessment quiz.

## WHAT YOU CAN DO:

### • MAKE CUSTOM QUIZZES

These can be multiple choice and short answer questions including options to insert images.

### • MARK AUTOMATICALLY

When setting up your quizzes you have the option to program in correct responses so the quiz will mark itself!

### • SET TIME LIMITS

Use the 'space race' option your students can compete against each other in teams.

### • GET FEEDBACK

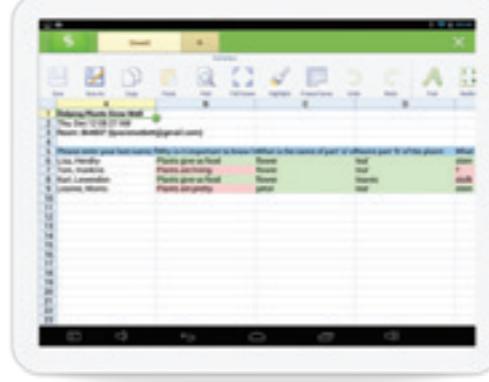

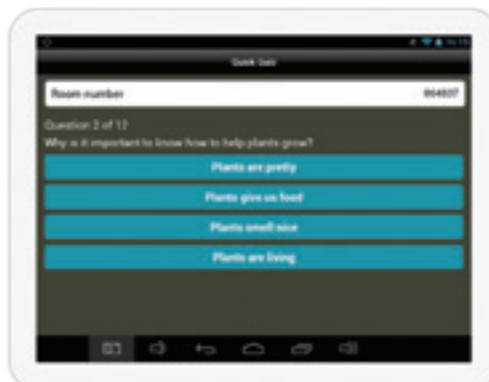

Using the 'Exit tickets' function you can assess what your students have learned in a particular lesson.

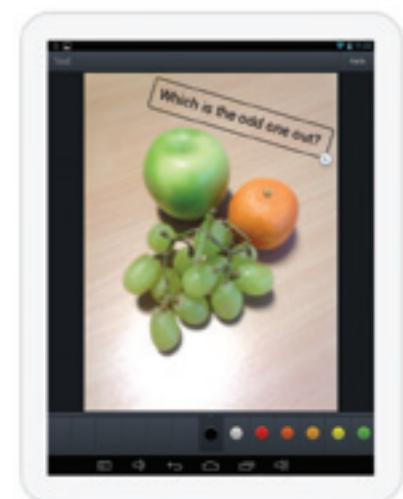

### • USE EXISTING TESTS

Made by a colleague or another Socrative user anywhere in the world.

### • RECORD

Quiz results are automatically stored and there is the option to export them for record keeping and analysis.

STUDENT TOOLS

## Photo Editor

Aviary is a quick, easy tool for editing photos and other images and it's great for projects, presentations and display work.

### WHAT YOU CAN DO:

#### • BE REALLY CREATIVE

Find an image you've taken, or sourced, and enhance it to improve the appearance of the photo. You can then adjust its size and orientation and edit it by selecting from the range of effects, frames and stickers.

#### • IMPROVE THE QUALITY

If you take a photo of somebody and it results in red eyes and unwanted visible blemishes it can be quickly fixed using the removal tools.

#### • ANNOTATE

If you want to add a comment to your image, Aviary enables you to draw or type over the top of it.

#### • EXPORT

Completed work can be exported to the ClassCloud using LearnPad's Hand In feature.

## Lesson Ideas

To help get you started, here are some ideas of photographic projects that this tool could support:

- History – recreate historical events
- Maths – record mathematical concepts e.g. symmetry found in their environment
- English – photographic storyboard of the main events of a text
- R.E. – document examples of good use of skills
- PSHE – record examples of good practice e.g. healthy eating found throughout the school

### Did you know?

When making a collage of your edited pictures, this app can be used in partnership with Pic Collage (see page 09)

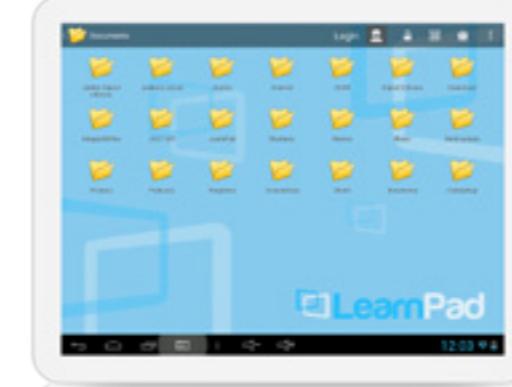

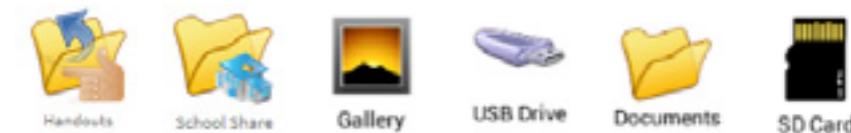

STUDENT TOOLS

## Utilities & Folders

### FILE ACCESS

It couldn't be simpler. Students can easily locate files stored in key locations including Documents and the Photo Gallery and find items that have been handed out by the class teacher. They can access their networked folders from here too (when they have logged in to LearnPad), and you can even use a USB memory stick and open, edit and save files. And if you want to boost the storage memory of the LearnPad you can use an SD Card.

### Did you know?

It is possible to customise the tools menu to meet the needs of your students. For example you may wish to add an open web browser, access to a VLE, or a link to your school website.

To learn more about this visit  
[www.learnpad.com/support](http://www.learnpad.com/support)

## SAMPLE LESSON PROFILE

# EYFS Starter

The EYFS Starter Lesson Profile has been designed to help you embed LearnPad into your Early Years setting straight away.

This is a general Lesson Profile full of apps and web-based resources that children can complete independently or as part of a guided activity. It has been put together to address some of the key areas of the curriculum and give an example of the range of resources available through the LearnPad Store that are suitable for foundation stage children.

**The resources have been organised into the following category folders:**

## Art

A selection of easy-to-use tools that allow children to express their creativity. The resources also allow students to explore symmetry and repetition of pattern.

## Stories

A collection of engaging, interactive stories to enthuse children at the early stages of reading.

## Phonics and Early Writing

A series of fun activities that help children to build words by applying the letter sounds that they have learned.

## Numbers and Shapes

Children can practise their mathematical skills including counting, comparing numbers, sizes and shapes.

## Games

A range of games for learning, whole-class fun, rewards, or activities for early finishers.

Find more lessons online

## SAMPLE LESSON PROFILE

SCAN TO DOWNLOAD

Launch the QR scanner by clicking on the icon on the toolbar and scan in this QR Key.

### Did you know?

You can send this, or any other pre-created Lesson Profile to multiple LearnPad devices.

To find out how to do this visit [www.learnpad.com/support](http://www.learnpad.com/support)

**Please note:** This Lesson Profile is over 30MB. It may put considerable demand on your Wi-Fi network, particularly when downloading onto several devices at once.  
**Tip:** Set larger Lesson Profiles to download outside of teaching hours

## SAMPLE LESSON PROFILE

# Primary Starter

Using the resources within the Primary Starter Lesson Profile, you can begin embedding the use of LearnPad within your lessons straight away.

This is just a small selection of resources that are suitable for primary school age, visit [www.learnpad.com/store](http://www.learnpad.com/store) to take a look at the other resources available.

**The resources in this Lesson Profile have been organised into the following Category folders:**

## Music, Art and Design

Resources that enable music composition as well as art tools allow children to easily create collages around a particular theme and explore symmetrical patterns.

## Maths

Rehearse mental maths skills using these great resources that can be used as a starter activity or for early finishers. This category also contains tools that enable students to create graphs as well as resources taken from the ever-popular BBC site.

## English

This category contains a collection of eBooks and online reading resources. In addition, children can develop their reading, word and sentence level skills.

## Science

Young minds can discover more about earth and space, states of matter and electricity. There are also more general resources allowing exploration of other areas of the science curriculum.

## Computing

A selection of resources to support the Primary Computing curriculum, including tools to help develop programming skills.

## Foundation Subjects

A selection of map resources and information sources that could be used within Geography and History lessons.

## SAMPLE LESSON PROFILE

SCAN TO DOWNLOAD

Launch the QR scanner by clicking on the icon on the toolbar and scan in this QR Key.

### Did you know?

You can take a pre-created Lesson Profile and modify the contents to suit you.

For more information about how this is done visit [www.learnpad.com/support](http://www.learnpad.com/support)

**Please note:** This Lesson Profile is over 100MB. It may put considerable demand on your Wi-Fi network, particularly when downloading onto several devices at once.  
**Tip:** Set larger Lesson Profiles to download outside of teaching hours.

## SAMPLE LESSON PROFILE

# Secondary Starter

Using the resources within the Secondary Starter Lesson Profile, you can begin embedding the use of LearnPad within a range of subject areas straight away.

This is just a small selection of resources that are suitable for secondary school age, visit [www.learnpad.com/store](http://www.learnpad.com/store) to take a look at the other resources available, including those related to other subject areas.

The resources in this Lesson Profile have been organised into the following Category folders:

## Library

A collection of English literature classics including a selection of Shakespeare and Charles Dickens titles.

## Maths

Resources include an app to practise mental maths skills, a calculator and dice to support classroom activities.

## Geography

These resources include maps and aerial photos of the UK and resources to help with the comparison of countries.

## Sciences

Support your science teaching with a range of resources including describing motion, the periodic table and a 3D model of the brain.

## History

Learn about key historical figures such as Anne Frank and different periods throughout British History.

## SAMPLE LESSON PROFILE

### Did you know?

You can take a pre-created Lesson Profile and change the wallpapers and icons

To learn how to do this see our support guides at [www.learnpad.com/support](http://www.learnpad.com/support)

**Please note:** This Lesson Profile is over 50MB. It may put considerable demand on your Wi-Fi network, particularly when downloading onto several devices at once.  
**Tip:** Set larger Lesson Profiles to download outside of teaching hours

## SAMPLE LESSON PROFILE

# Ancient Egypt

## SAMPLE LESSON PROFILE

SCAN TO DOWNLOAD

Launch the QR scanner by clicking on the icon on the toolbar and scan in this QR Key.

### Did you know?

Any pre-created Lesson Profiles can be modified to meet the needs of your students.

**Please note:** This Lesson Profile is over 20MB. It may put considerable demand on your Wi-Fi network, particularly when downloading onto several devices at once. **Tip:** Set larger Lesson Profiles to download outside of teaching hours

## SAMPLE LESSON PROFILE

# Earth & Space

This Lesson Profile has been created to compliment teaching of the Year 5 Programme of Study 'Earth and Space'.

As this is a topic level Lesson Profile, it is expected that students would re-visit the content over a number of lessons spanning several weeks. The resources have been organised into Category folders and consist of a mixture of engaging apps, videos and websites that teach students about:

- The solar system and the planets contained within it, including the different models put forward by scientists to describe the structure of the solar system
- The rotation of the Earth resulting in day and night
- An explanation of why we have seasons and why the length of day changes
- The Earth's moon, including the Apollo 11 moon landing and different phases of the moon
- Types of stars, how they are formed, what they are made of and constellations

## Curriculum Links

### Year 5 → Earth and Space

#### Pupils should be taught to:

- Describe the movement of the Earth, and other planets, relative to the Sun in the solar system
- Describe the movement of the Moon relative to the Earth
- Describe the Sun, Earth and Moon as approximately spherical bodies
- Use the idea of the Earth's rotation to explain day and night and the apparent movement of the sun across the sky

## SAMPLE LESSON PROFILE ↵

SCAN TO DOWNLOAD

Launch the QR scanner by clicking on the icon on the toolbar and scan in this QR Key.

### Did you know?

You can create your own Lesson Profile using resources from the LearnPad Store, web links and your own files.

To learn how to do this visit: [www.learnpad.com/support](http://www.learnpad.com/support)

**Please note:** This Lesson Profile is over 20MB. It may put considerable demand on your Wi-Fi network, particularly when downloading onto several devices at once.  
**Tip:** Set larger Lesson Profiles to download outside of teaching hours

## SAMPLE LESSON PROFILE

# KS3 Computing

The KS3 Computing Lesson Profile has been designed to help you deliver elements of the new Computing curriculum.

We've created a broad Lesson Profile full of apps and web-based resources that you can use with both beginners and more advanced learners.

The resources have been organised into the following Category folders:

### Algorithms

A simple selection of websites and video that introduces/reinforces the concept of an algorithm.

### Boolean

A collection of videos, websites and apps which introduce learners to the world of Boolean logic and Internet searches.

### Internet and Security

How the Internet has developed, how it is managed and how encryption works to ensure that financial dealings are kept confidential between sender and recipient.

### Binary

A collection of videos, games and activities which aim to get students thinking about and using binary systems. Surprisingly, they also prove that studying binary numbers can be weirdly addictive.

### Programming

We've collated a wide range of apps and sites here which cover a variety of different coding activities and languages. Not everyone will be starting KS3 Programming at the same level so we've included a variety of challenge levels from simple Light Bot to C++!

**Please note:** This Lesson Profile is over 100MB. It may put considerable demand on your Wi-Fi network, particularly when downloading onto several devices at once. **Tip:** Set larger Lesson Profiles to download outside of teaching hours

## SAMPLE LESSON PROFILE ↵

SCAN TO DOWNLOAD

### Did you know?

You can use the 'Places' feature to set a default Lesson Profile for a specific room within your school.

- Log into the LearnPad management Portal ([www.learnpad.com](http://www.learnpad.com)), Click Manage, Admin, Places.
- Create a new Place, select it and select the name of the default Lesson Profile.
- Students can now check in to your Place and launch the default Lesson Profile.

## SAMPLE LESSON PROFILE

# The Human Body

The Human Body Lesson Profile has been created to offer KS3/4 students some advanced insights into human physiology and anatomy.

It includes some great quality resources which can be used as input material for whole-class, group or individual work.

## Anatomy

A great way of introducing the structure and function of the components of the human body.

## Brain

Videos and an interactive app which introduce learners to the way in which the brain works. Includes the video of a famous selective attention test that has fooled thousands of people over the years.

## Diseases

Quite advanced content covering cancer, infection and heart valve replacement.

## Heart and Circulation

Apps, videos and games give a simple introduction to the structure of the human heart and how it works; this category also covers how to maintain a healthy heart.

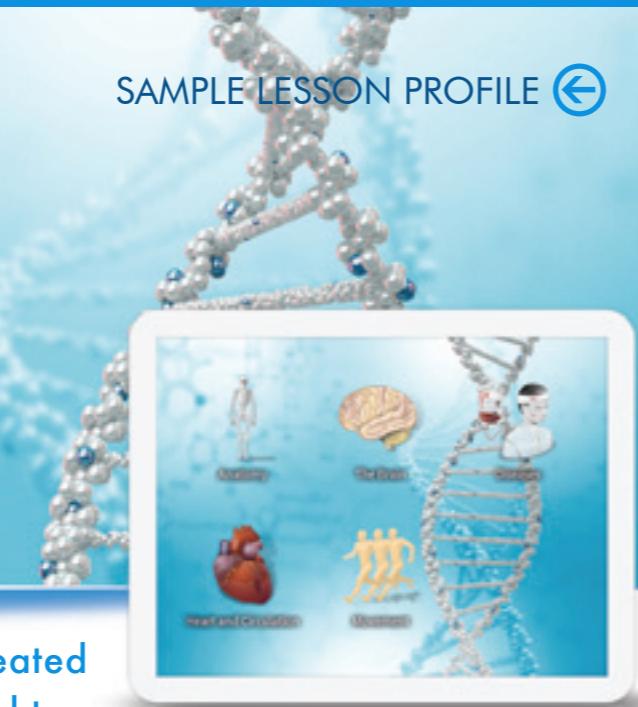

## Movement

Probably as useful for PE as it is for Biology, this category includes some great slo-mo video of athletes and the analysis of different types of movement, including flexion, abduction, adduction, rotation and extension.

**Please note:** This Lesson Profile is over 100MB. It may put considerable demand on your Wi-Fi network, particularly when downloading onto several devices at once. **Tip:** Set larger Lesson Profiles to download outside of teaching hours

### Did you know?

**Use of Hand In / Hand Out**  
After completing their worksheet, students can submit their work to the ClassCloud area of the LearnPad Management Portal by using the Hand In feature. You can then retrieve their work and mark electronically, print it or hand it out to other students to be used as an example of good work or peer assessment.

## Curriculum Links

English → Year 3/Year 4 → Composition

Pupils should be taught to:

Draft and write by:

- In narratives, creating settings, characters and plot

**Please note:** Because this Lesson Profile is mapped to one particular lesson it requires fewer resources and is therefore smaller in size (about 20MB). Lessons like this will put less demand on your Wi-Fi network.

# Quick Tips

Hopefully this booklet has helped you get a good understanding of your LearnPads. Here's a list of top tips and some links to other sources of help.

## POWERING & CHARGING LEARNPAD

- After each day, your LearnPads should be turned off, stored and charged overnight
- Press and hold the power button to turn LearnPad on and off
- Press and release the power button quickly to put LearnPad in and out of sleep mode
- It may take a few moments to re-connect to your wireless when coming out of sleep mode

## USING THE LEARNPAD QRKEY SCANNER

- You can use the front or rear cameras to scan a QrKey. Use this icon to switch between them
- Hold the QrKey about 30cm away from the camera and keep it as still and as flat as you can
- Wait for the yellow dots to find the corners, then they will turn green and beep to confirm
- Different lighting, QrKey size and printed material type may affect scanning behaviour

## USE CLASSCONNECT TO:

- View and control classroom tablet devices
- Monitor student activity
- Remotely suspend or lock individual or grouped devices
- Deploy new activities or Lesson Profiles
- Receive alerts from devices, such as low battery warnings

## LEARNPAD ONLINE GUIDES, VIDEOS & SUPPORT

### LearnPad online support

<http://learnpad.com/support>

Providing technical setup information, help with the advanced features of LearnPad and general troubleshooting help, the LearnPad support pages have plenty of clear advice and direction. Just use the link above.

### Contact our curriculum team

[content@learnpad.com](mailto:content@learnpad.com) - 0845 862 0390

If you have questions about using your LearnPads to teach, about the included resources, or how to get the best from your devices, please contact our curriculum team.

### Contact our technical helpdesk

[support@learnpad.com](mailto:support@learnpad.com) - 0845 862 3390

If you are experiencing any technical problems with the LearnPads, please contact our technical support helpdesk.

# The LearnPad store

The LearnPad Store contains over a thousand tools, apps, documents, website links, videos and presentations, and we're constantly adding more as they become available.

## SEARCH FROM OVER 1000 CLASSROOM RESOURCES

KEYWORD	SUBJECT	KEY STAGE	AGE RANGE
---	All	All	All

The search terms are all optional but the more of them you use the more targeted the results will be.

Subject, Key Stage and Age Range are self-explanatory but the Keyword can really make a difference and could be something as broad as 'Phonics' or as specific as 'Volcanoes'.

UK TOPIC	UK SUBTOPIC	COUNTRY
All	All	All

You'll see you can search on Country and this is highly advisable. LearnPad supports learners in many different countries; making sure this search box is set to your country will ensure that your results are relevant, and in the correct language.

PRICE
All

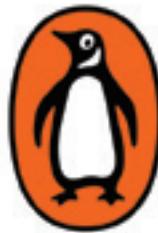

Your final search option is Price. There are a considerable number of free Resources in the store as well as some Premium content from leading publishers. If you have budget at your disposal and are considering purchasing content, then choose the 'Premium' option.

## Win £100 worth of content

Email us at [community@learnpad.com](mailto:community@learnpad.com) and tell us how you are using your LearnPads and be in with a chance of winning £100 worth of content vouchers to spend on world class content from our store.

Content available includes

 **LearnPad**
